Artwork for *wood, cultured marble & paper urns*

Laser engraving allows you to permanently cut into a wood, cultured marble or paper urn with a name, personal text, and even artwork in tribute to a loved one. Most urns can accommodate 3 lines of text and a design chosen from these two pages if desired. With wood urns, engraved text and art can be left unfilled for a natural look or filled for best contrast. With cultured marble urns, engraved text and artwork should be filled for best readability.

Artwork for *brass & metal urns*

Engraving on metal urns generally is not filled but relies on the natural contrast between the polished or painted exterior finishes and the underlying metal. With rotary engraving, our expert engravers cut right into the brass or metal to show your loved one's name, personal text, or a design of your choice from these two pages.
